

BetaPLEXX

For energy compensation in dairy cows

Supplementary feed for cattle

- **Can contribute to ketosis prophylaxis**
- **Has a positive influence on the citric acid cycle, e.g. by controlling electron transfer**
- **Reduces the formation of ketone bodies**
- **The conversion of panthenol into pantothenic acid (vitamin B5) supports the anti-inflammatory effect**

Dosage:

Your feed advisor will help you with the individual setting.

Packaging: 25 kg bag / big bag
