

# D - CAB

To support milk fever prophylaxis

Supplementary feed for cattle

- **Supports the control of the cation - anion balance**
- **GMO - free**
- **Has excellent chloride and sulphur sources**
- **Neutral in taste, which does not impair feed intake**

The determination of the calcium, potassium, chlorine and sulphur values of the farm's own feed (DCAB) is a basic requirement for the use of „D-CAB“ and is necessary in all preparatory rations under expert advice.

Dosage:

Your feed advisor will support you with the individual setting.

Packing: Big Bag
