

RUPPNER PFERDEFUTTER

Spezialfutter Neuruppin GmbH & Co. KG

DIATOMACEOUS EARTH

Natural support for the regeneration of skin and hooves

A purely natural product

For support with coat, skin and joint

Grain-free

May act as an intestinal regulator and pollutant binder

Diatomaceous earth is a natural bioregulator with a dietary and probiotic effect. It is suitable for horses in the change of coat, with joint problems but also for strengthening the coronary band and for hair and skin problems such as eczema, skin rash or hair loss. In addition, diatomaceous earth supports intestinal regulation, the binding of pollutants and can reduce diarrhoea symptoms.

Feeding recommendation:

- 5-10 g pro 100 kg body weight and day

This supplementary feed should be given over a longer period of time. For a feeding period of more than 6 weeks, we recommend consulting a veterinarian.

Packing: 2 kg bucket
