## LINSEED OIL

Supports skin and coat metabolism and digestion

Rich in omega-3 fatty acids

Supports digestion

Promotes skin and coat metabolism

Our linseed oil is a cold-pressed oil that is ideal for feeding horses. Due to the cold pressing, the various oil substances are preserved. Linseed oil is a purely natural product with positive effects on the skin and coat metabolism. Due to its high content of omega-3 fatty acids, it can balance the often too high omega-6 ratio in the ration. In addition, omega-3 fatty acids promote a shiny coat and healthy muscles. Just 50 ml a day is enough to support a balanced diet for the horse and to benefit from the positive properties of the oil.

**Feeding recommendation:** Our linseed oil can be fed to horses of all ages. We recommend the administration of at least 8 ml per 100 kg body weight per day. For a large horse weighing 600 kg, this corresponds to approx. 50 ml per day. With slow habituation, a higher dosage can be given.

**Packing:** 1 litre, 5 litre
