RUPPNER FOAL MILK

The optimal alternative to mare's milk

Full-value substitute for breast milk

Also for horses that cannot eat solid food

Our foal milk serves as a warm drink for foals and is a skimmed milk drink with 81% milk components, 21% raw protein and 19% raw fat. It is a full substitute for mother's milk and is used when the mare has too little or no milk or for motherless foals. It can also be used for horses that cannot eat solid food.

Feeding recommendation:

As a supplementary feed, foal milk should be fed to foals up to a maximum age of 6 months.
