

RUPPNER PFERDEFUTTER

Spezialfutter Neuruppin GmbH & Co. KG

RUPPNER HUF-REPAIR

To promote hoof and coat growth

Supports hoof growth and hoof strength

Promotes the elasticity of the hooves

With zinc, vitamin E, vitamin B6 and selenium

Biotin - supplier

Ruppiner Huf - Repair is a feed supplement with highly concentrated biotin. Biotin is a coenzyme that is significantly involved in the carbohydrate, fat and protein metabolism. These processes contribute, among other things, to hair and nail or hoof growth. The resilience, functional structure and elasticity of the hoof are the prerequisite for any possibility of movement and the well-being of the horse. A deficiency can therefore lead to skin and hoof damage. The hooves can become soft, brittle or cracked. Exhaustion or eczema can also be effects of a biotin deficiency.

Feeding recommendation: Due to the higher content of trace elements compared to complete feeds, this supplementary feed may only be fed with up to 5 g / 100 kg body weight / day. For a large horse (600 kg) this corresponds to 30 g / animal / day. The feeding recommendation refers to a roughage intake (hay) of 1.5 kg per 100 kg body weight and day. For an optimal result, constant administration over 12 months is recommended. One measuring spoon corresponds to approx. 20 g.

Composition: Wheat semolina bran, glucose, linseed extruded, wheat bran extruded, sugar beet molasses
Analytical ingredients and contents: 11.8% crude protein, 5.4% crude fat, 4.1% crude fibre, 18.48% crude ash, 0.09% calcium, 0.55% phosphorus, 0.04% sodium, 0.27% magnesium, methionine: 2.15%
Additives (per kg): Biotin: 3,000,000 mg, Zinc: 5,250 mg, Methionine from DL-Methionine (3c301)

Packing: 1,5 kg bucket
