RUPPNER PRÄBIOTIC MASH

Mash to stabilise the gastrointestinal tract

Formation of a protective mucus layer

For support in the case of watery stools or digestive disorders

With extruded (cracked) linseed, brewer's yeast and pectins

Ruppiner Präbiotic Mash is based on the traditional composition of mash and has been further developed according to the latest nutritional approaches to stabilise the gastrointestinal tract. Our mash has a prebiotic effect and can be used as a supportive measure for problems with watery stools. The grain-free mash stimulates both digestion and metabolism. The added pectins from apple and citrus fruits can support the regeneration of the stomach lining. Pectins have a targeted natural effect and regulate digestion. Ruppiner Präbiotic Mash contains a disproportionately high amount of pectin, which has three special advantages. Firstly, free water is bound in the anterior digestive tract and thus prolongs the passage time when diarrhoea occurs. Furthermore, swollen pectin forms a highly viscous mucus layer on the mucous membrane of the stomach and small intestine. It thus has a soothing effect on inflamed mucous membranes and offers protection against the adhesion of pathogenic germs. As a final point, the prebiotic effect promotes the intestinal flora and supports the displacement of pathogenic germs. Ruppiner Präbiotic Mash can thus help to promote and build up a stable intestinal flora.

Feeding recommendation: Ruppiner Präbiotic Mash can be given as needed with up to 150 g per 100 kg body weight. For a large horse (600 kg) we recommend an administration of up to 900 g per horse. The feeding recommendation refers to a roughage intake (hay) of 1.5 kg per 100 kg body weight and day. Pour 1 - 3 litres of warm water on 1 kg of Ruppiner Präbiotic Mash and leave to swell for approx. 15 - 20 minutes.

CAUTION: do not use boiling water!

Composition: Wheat semolina bran, alfalfa meal, apple pomace, extruded linseed, extruded wheat bran, pea hulls, brewer's yeast, rapeseed oil, dried grape seed meal and grape pomace, pectins from apple and citrus fruits, sodium chloride

Analytical ingredients and contents: 14.1% crude protein, 10.9% crude fat, 19.2% crude fibre, 6.8% crude ash, 0.63% lysine, 0.27% methionine, 0.78% calcium, 0.6% phosphorus, 0.41% sodium, 0.32% magnesium

Packing: 2 kg bucket, 10 kg bag
