## RUPPNER MINERAL - PELLET

Whole food mineral feed for daily mineral supply

Our Ruppiner Mineral in pellet form is a high-quality complete mineral feed. The pelletisation contributes to a better feed intake. Minerals, vitamins and trace elements are vital nutrients that are an important building block for almost all functions in the body, in order to ensure that these functions run smoothly. The mineral supply also has a great influence on the horse's skin, hooves, hair, metabolism and cell protection. Ruppiner Mineral ensures an optimal supply for your horse due to the balanced ratio of minerals.

**Feeding recommendation:** This supplementary feed may only be fed at up to 42 g / 100 kg body weight due to the higher content of vitamin D3 and trace elements compared to complete feeds. The feeding recommendation refers to a roughage intake (hay) of 1.5 kg per 100 kg body weight and day. Depending on the performance requirements, we recommend a daily intake of 25 g to 42 g per 100 kg body weight. For a large horse, this corresponds to a dose of approx. 150 g - 250 g per animal and day. One measuring cup corresponds to approx. 130 g.
